Section 4. SHORT SUMMARY REPORT (Compulsory) – This report will be shared on EAAFP website

Provide a short article about your WMBD event or activity you arranged to celebrate WMBD. The following information (venue, organiser, number and type of participants, outcome) should be included in your article. (Minimum 200 words)

Celebration of World Migratory Bird Day 2019 Indonesia organized by the Faculty HIMPUS Unsyiah begins with a series of activities Nasioanal Photography Competition on Date 1 to 30 April 2019 was followed by 53 participants from all over Indonesia. After all photos are received on May 1-5 2019 all photos are judged selectively. The judges are: drh. Agus Nurza, M.Sc, Chaideer Mahyuddin and Organizing Committee.

On May 7, 2019 the best photo results were obtained from the work of Rendra Des Kurnia from Banyuwangi, Indonesia. He photographed the spesies Sea Dara (*Sterna bengalensis*), which was bound to a plastic surface in the ocean. From this work, he received an award of 70.09 USD in cash and a certificate.

Feast day World Migratory Bird Day 2019 execution of seminars and birdwatching on May 11, 2019 at the Hall of the Faculty of Veterinary Medicine University of Syiah Kuala. The speaker of this seminar was drh. Agus Nurza, M.Sc and Rubama. These two people are experienced birdwatchers and ecological observers from Aceh.

In this seminar Rubama campaigned for the movement to reject garbage and maintain migratory birds in Indonesia. The seminar participants were very enthusiastic in responding to this appeal. Rubama expressed the urgency of this very world garbage pollution.

Drh. Agus Nurza, M.Sc provides an overview of the impact of waste pollution on migratory birds and other wildlife. It is very ironic that the image is shown from the material presented. The material conveyed was very good so that the mindset of the participants was open to safeguarding the species of bird migratory water from garbage pollution.

The seminar was attended by birdwatchers, students and the general public with 150 participants.

After the seminar was completed, the committee and some participants did birdwatching on Ulee Beach in Banda Aceh. Birdwatching activity is done to see direct water bird habitat for migratory birds and the existing problems habitat.

When Birdwatching lasts seen small colonies of species of sandpiper which is resting on the beach. It is ironic to see the birds resting with plastic trash. The proof of plastic is now a habitat problem for waterbirds. But there is something even more ironic that birdwatching participants saw a net installed in the middle of the beach that was alleged to ensnare the birds.

Hopefully this diligent Seminar and Birdwatching activity can open your mind and make you aware of protecting the ecosystem and not using excessive plastic. The speaker strongly emphasized that "if we do not prevent being interpreted in the next 10 years we will no longer see the migratory birds," said drh. Agus Nurza M, Si.
