

REPUBLIC OF KOREA  
**KOREA  
PAVILION**  
IUCN World Conservation Congress  
3-11 September, 2021  
Marseille, France

## Program

Date	Time	Program	Organization
Sep 4 (Sat)	10:30 - 11:30	Getbol, Korean Tidal Flats	The Ministry of Oceans and Fisheries of the Republic of Korea (MOF) World Heritage Promotion Team of Korean Tidal Flats Korea Marine Environment Management Corporation (KOEM)
	12:00 - 14:00	Carbon Free Island, Jeju & Jeju Action for outstanding nature	Jeju Special Self-Governing Province
	14:30 - 16:30	Carbon Neutrality and Biodiversity – Promoting renewable energy to minimize negative impacts to ecosystems	Ministry of Environment of the Republic of Korea
Sep 5 (Sun)	10:30 - 12:30	Asia's Protected Areas – Cornerstones for Sustainable Development	Korea National Park Service
	14:30 - 15:30	The working Group meeting for the World Environmental Hubs (Closed)	Jeju Special Self-Governing Province (UNESCO)
Sep 6 (Mon)	10:30 - 11:00	National Institute of Biological Resources (NIBR) to conserve values of Biodiversity	National Institute of Biological Resources (NIBR)
	14:00 - 16:00	Activities of East Asia Biodiversity Conservation Network (EABCN) to implement the GSPC targets in East Asia	East Asia Biodiversity Conservation Network
Sep 7 (Tue)	10:30 - 12:30	DAEJAYON Report	DAEJAYON
	14:00 - 16:00	Building momentum towards the XV World Forestry Congress	Korea Forest Service (XV World Forestry Congress Secretariat)
Sep 8 (Wed)	10:30 - 12:30	Small Earth in Republic of Korea, National Institute of Ecology	National Institute of Ecology, Republic of Korea

An abstract graphic on the right side of the page, consisting of three overlapping, curved, brush-stroke-like shapes. The top shape is blue, the bottom-left shape is green, and the bottom-right shape is red. The shapes have a textured, painterly appearance with some white highlights and irregular edges. The text "Program Details" is centered over the blue shape.

## Program Details

## Getbol, Korean Tidal Flats

Saturday, 4 September, 10:30 - 11:30

### Purpose

The World Heritage Committee decided Getbol, Korean Tidal Flats to be inscribed in World Heritage List in the 44th Session this year. The Outstanding Universal Value of Getbol approved by the committee is that the property is globally one of the most important and meaningful habitats for conservation of global biodiversity and especially, has an international significance as a major stopover site of endangered migratory waterbirds in East Asian-Australasian Flyway.

### Detailed Program

Program

- Getbol, Korean Tidal Flats
- Introduction of the international importance of the Getbol and its Outstanding Universal Value

### Organization

- The Ministry of Oceans and Fisheries of the Republic of Korea (MOF)
- World Heritage Promotion Team of Korean Tidal Flats
- Korea Marine Environment Management Corporation (KOEM)

### Relevant Congress Themes

- Managing landscapes for nature and people
- Restoring ocean health

### Relevant Forum objectives

- To showcase that conservation works
- To mainstream conservation

### Contact Information

- Ph.D. Kyong-O, MOON, World Heritage Promotion Team of Korean Tidal Flats  
nacaffy@naver.com / +82-61-246-3356
- Ms. So-hyun Park, KOEM  
gusdl@koem.or.kr / +82-2-3498-7100

## Carbon Free Island, Jeju & Jeju Action for outstanding nature

Saturday, 4 September, 12:30 - 14:00

### Purpose

Publicizing and sharing the cases of environmental conservation and environmental policies being promoted by Jeju on the basis of carbon-neutrality for achieving socio-economically sustainable development and for preserving Jeju's environmental assets including the four internationally protected areas.

### Detailed Program

Program	Speaker
<b>Carbon Free Island, Jeju &amp; Jeju Action for outstanding nature</b> - Ready to invite UNFCCC COP28 to Jeju & How to conserve nature hotspots	<b>Pro. JUNG, Dae-Yeun (Video clip)</b> <b>Pro. SUH, Young-Bae</b> <b>Director Kim, Yang-Bo</b>
The Framework of Carbon-free Island, Jeju responding to carbon emission and climate change based on Jeju's environmental assets such World Natural Heritage, Biosphere Reserve, World Geopark, Ramsar Wetlands, etc., Jeju's Framework of Environment-related Policies, and Jeju's Preparedness of Inviting UNFCCC COP28 to Jeju in 2023 will be introduced through video presentation (for 35 minutes)	
And then, World Natural Heritage, Biosphere Reserve, World Geopark, Ramsar Wetlands, etc, all of which are Jeju's environmental assets will be introduced in detail through video, and followed by UNESCO-sponsored Global Research and Training Center for Internationally Designated Aresa(GCIDA) to be established in Jeju where is the only one region having four internationally protected areas in the world, The 9th International Conference on UNESCO Global Geoparks to be held on Jeju in December, 2021, and Jeju as the venue inviting UNFCCC COP28 to Jeju in 2023 (25 minutes)	
The above program will run two rounds.	
Distribute souvenirs to participation in Jeju event (in Korea Pavilion)	
- Cosmetic products (Hand cream made from Jeju plant_Camellia, Centella asiatica, Tangerrine, Seaweed etc.)	

### Organization

- Jeju Special Self-Governing Province

### Relevant Congress Themes

- Accelerating climate change mitigation and adaptation

### Relevant Forum objectives

- To catalyse action and transformative initiatives

### Contact Information

- Ms. Suk-Hee Hyun, Jeju Special Self-Governing Province  
maygirl@korea.kr / +82-10-5263-1674

## Carbon Neutrality and Biodiversity – Promoting renewable energy to minimize negative impacts to ecosystems

Saturday, 4 September, 14:30 - 16:30

### Purpose

To share information on renewable energy and biodiversity such as proper guidelines in views from policymakers and experts in technologies and policies.

In order to make the climate-resilient future envisioned in the Paris Agreement and the Sustainable Development Goals, renewable energy should be promoted widely. However, it is critical to minimize ecological disturbance resulted by renewable energy generation and to ensure sustainable coexistence between technology and the nature. In this seminar, the speakers will share information on renewable energy and biodiversity such as proper guidelines in views from policymakers and experts in technologies and policies.

### Detailed Program

Program	Speaker
<b>Institutional approach to ensure coexistence between wind power generation and biodiversity</b>	<b>Mr. Hanchang CHOI, Director,</b> <i>Ministry of Environment of the Republic of Korea</i>
<b>Mitigating biodiversity impacts associated with solar and wind energy development</b>	<b>IUCN expert (TBC)</b>
<b>&lt;Topics related to renewable energy and biodiversity&gt;</b>	<b>Government Representatives (TBC)</b>

### Organization

- Korea Marine Environment Management Corporation (KOEM)

### Catering

- Yes

### Relevant Congress Themes

- Accelerating climate change mitigation and adaptation  
- Advancing knowledge, learning, innovation and technology

### Relevant Forum objectives

- To mainstream conservation

### Contact Information

- Ms. Hyein Suh, Ministry of Environment of the Republic of Korea  
nepd@korea.kr

## Asia's Protected Areas – Cornerstones for Sustainable Development

Sunday, 5 September, 10:30 - 12:30

### Purpose

This session will provide a comprehensive assessment of Asia's progress towards the achievement of Aichi Biodiversity Target 11, and identify ways of strengthening the contribution of protected areas to the Sustainable Development Goals (SDGs) and the Post-2020 Global Biodiversity Framework.

### Detailed Program

#### Program

The main topics to be addressed by the session will include the current status of Aichi Biodiversity Target 11 in Asia; successes, challenges and lessons learned to date; mechanisms for strengthening regional collaboration for Asian protected areas; and the roles of protected areas in addressing the Post-2020 Global Biodiversity Framework and Sustainable Development Goals (SDGs) 14 and 15.

The first part of the session will present the results of the recent analysis of Target 11 carried out by the ASEAN Centre for Biodiversity, in collaboration with the CBD Secretariat. The analysis will go beyond an assessment of the extent of protected area coverage in order to look at the other aspects of Target 11 dealing with PA quality, such as management effectiveness. The second part of the session will introduce the Asia Protected Areas Partnership (APAP) as a key platform for enhancing regional collaboration and accelerating the achievement of PA target. The progress which APAP has made while the Republic of Korea served as co-chair of the Partnership will be addressed. Finally, the session will address the role of protected areas in delivering Sustainable Development Goals (SDGs) and the Post-2020 Biodiversity Framework. The potential for greater regional collaboration will be highlighted through an introduction on the 2nd Asia Parks Congress.

This session will help to ensure that the voice of the Asian protected area community is heard by the global conservation community.

The session will include:

- A presentation on Asia's progress towards Target 11, highlighting successes, challenges and lessons (ASEAN Center for Biodiversity);
- A presentation on APAP, as a key platform for enhancing regional collaboration and accelerating the achievement of PA targets (Korea National Park Service, IUCN);
- A presentation on: the role of protected areas in delivering SDGs 14 and 15; the role of protected areas in the Post-2020 Biodiversity Framework; and new approaches to strengthening regional collaboration focusing on the 2nd Asia Parks Congress (IUCN).

\*Lunch will be served.

### Organization

- Korea National Park Service, Ministry of Environment of the Republic of Korea, IUCN, ASEAN Center for Biodiversity

### Relevant Congress Themes

- Managing landscapes for nature and people
- Conserving freshwater to sustain life

### Relevant Forum objectives

- To catalyse action and transformative initiatives

### Contact Information

- Ms. Min-sun Kim, Senior Program Officer, Korea National Park Service  
mskim@knps.or.kr / +82-10-4655-9537

## The Working Group Meeting for the World Environmental Hubs (Closed)

Sunday, 5 September, 14:00 - 15:30

### Purpose

IUCN and Jeju Special Self-Governing Province have continuously cooperated for ten years and joint projects with significant environmental hubs globally for global ecological conservation. For that, both organizations will prepare for a special meeting to discuss specific directions for the formation and operation of the World Environment Hub Council.

### Detailed Program

Program	Speaker
The Working Group Meeting for World Environmental Hubs	IUCN, Jeju Special Self-Governing Province, Korean Commission for UNESCO, IUCN Council, Experts etc.

### Organization

- Jeju Special Self-Governing Province (UNESCO)

### Relevant Congress Themes

- Upholding rights, ensuring effective and equitable governance
- Leveraging economic and financial systems for sustainability

### Relevant Forum objectives

- To strengthen engagement with the next generation of leaders
- To mainstream conservation

### Contact Information

- Mr. Yang-Bo Kim, Jeju Special Self-Governing Province (UNESCO)  
yb.kim@unesco.org

## National Institute of Biological Resources (NIBR) to conserve values of Biodiversity

Monday, 6 September, 10:30 - 11:00

### Purpose

To present the achievements of the National Institute of Biological Resources (NIBR) on biodiversity conservation.

### Detailed Program

Program
NIBR would like to present our works and achievements on biodiversity conservation, including the Korean Redlists publication Project (Video clip).

### Organization

- National Institute of Biological Resources (NIBR)

### Relevant Congress Themes

- Managing landscapes for nature and people

### Relevant Forum objectives

- To showcase that conservation works

### Contact Information

- Mr. Tae-Kwon Noh, NIBR  
taekom@korea.kr / +82-10-9681-7005

## Activities of East Asia Biodiversity Conservation Network (EABCN) to implement the GSPC targets in East Asia

Monday, 6 September, 14:00 - 16:00

### Purpose

To share its activities of the East Asia Biodiversity Conservation Network (EABCN) to implement Global Strategy for Plant Conservation (GSPC) in East Asia.

- ※ The EABCN was established by a Motion, Strengthening training and capacities for botanic gardens and arboreta staff for the Global Strategy of Plant Conservation (GSPC) 2020 in East Asia, which is proposed by Korea Forest Service and adopted at the IUCN World Conservation Congress in 2012.

### Detailed Program

Program	Contents
Introduction of EABCN (Video)	Information about EABCN
EABCN's activities and partnership (Video)	Why re we working on the Checklist? (Chin-Sung Chang / Soeul National University, South Korea)
	Red List for East Asian Region (Hui Kim / Mokpo National University, South Korea)
	Red List for China and Chinese Virtual Herbarium(CVH) (Haining Qin / Institute of Botany, Chinese Academy of Sciences, China)
	Progress Report on Digitization of Plant Biodiversity in Taiwan (Gene-Sheng Tung / Taiwan Forestry Research Institute, Chinese Taipei)
	Flora of Mongolia since 2016 (Shukhendorji Baasanmunkh, Changwon National University, South Korea)
Important plants of East Asia (Video)	Twenty threatened and endemic plants in East Asia

### Organization

- East Asia Biodiversity Conservation Network

### Relevant Congress Themes

- Accelerating climate change mitigation and adaptation

### Relevant Forum objectives

- To showcase that conservation works

### Contact Information

- Ms. Kae Sun Chang, Korea National Arboretum (EABCN Secretariat)  
natu17@korea.kr / +82-33-480-3030

## DAEJAYON Report

Tuesday, 7 September, 10:30 - 12:30

### Purpose

To raise awareness of climate crisis by introducing the climate crisis caused by human activity and the current global phenomenon which is a result of it.

To increase the role of young people in responding to climate crisis and preserving biodiversity by suggesting that the movement of young people is important now.

### Detailed Program

Program
DAEJAYON Introduction (Video)
DAEJAYON REPORT 5 (Video)
: By introducing climate crisis caused by human activity and the current global phenomenon which is a result of it, we will raise awareness and drive action of the young people on the importance of climate crisis response and biodiversity conservation.

### Organization

- DAEJAYON

### Relevant Congress Themes

- Accelerating climate change mitigation and adaptation

### Relevant Forum objectives

- To catalyse action and transformative initiatives

### Contact Information

- Ms. Hui Ryeon Lim, DAEJAYON  
greatnature@greatnature.org / +82-10-5615-1043

## Building momentum towards the XV World Forestry Congress

Tuesday, 7 September, 14:00 - 16:00

### Purpose

To heighten public awareness of the XV World Forestry Congress and encourage substantive contribution from a range of stakeholders, and to inspire global action in forestry and related sectors leading up to.

### Detailed Program

Program
Introduction of XV World Forestry Congress

### Organization

- Korea Forest Service (XV World Forestry Congress Secretariat)

### Relevant Congress Themes

- Managing landscapes for nature and people
- Advancing knowledge, learning, innovation and technology

### Relevant Forum objectives

- To strengthen engagement with the next generation of leaders
- To catalyse action and transformative initiatives

### Contact Information

- Ms. Dahyung Yang, Korea Forest Service (XV World Forestry Congress Secretariat)  
dahyungy@korea.kr / +82-42-482-0093

## Small Earth in Republic of Korea, National Institute of Ecology

Wednesday, 8 September, 10:30 - 12:30

### Purpose

Through the introduction of the National Institute of Ecology (NIE), NIE would like to create opportunities for collaboration with relevant organizations worldwide in ecological research, exhibition, and education

### Detailed Program

Program
Short Screening (07:38) about National Institute of Ecology (Video): The National Institute of Ecology (NIE) is a center for advanced ecological research, exhibition, and education. The NIE allows visitors to experience the ecosystem of the Korean peninsula and the world's five major biomes (e.g., tropical, desert, Mediterranean, temperate, polar) as well as animals and plants that inhabit those areas. The NIE aims to enhance the nation's competitiveness by leading ecological research at home and abroad, contributing to environmental conservation, and raising environmental awareness by offering people various opportunities to experience and learn about ecosystems.

### Organization

- National Institute of Ecology, Republic of Korea

### Relevant Congress Themes

- Managing landscapes for nature and people
- Conserving freshwater to sustain life

### Relevant Forum objectives

- To showcase that conservation works
- To mainstream conservation

### Contact Information

- Sung-Ryong Kang, National Institute of Ecology
