

East Asian–Australasian Flyway Partnership

2025 CALENDAR

World Migratory Bird Day

SHARED SPACES

Creating bird-friendly cities
and communities

In 2025, the World Migratory Bird Day (WMBD) highlights the need for a healthy coexistence between humans and birds. It focuses on creating and adapting environments that support migratory bird populations across all communities, from bustling cities to smaller towns and communities. This year's campaign advocates for strategic urban planning and conservation efforts that incorporate bird-friendly practices, making sure that our communities become havens for these remarkable travelers. The 2025 theme encourages action from all sectors, including national and local governments, businesses, community groups, and individuals worldwide.

This activity was supported by the World Migratory Bird Day Small Grant Program

The East Asian–Australasian Flyway (EAAF) is one of nine major migratory waterbird flyways around the globe and is home to 28–68 million migratory waterbirds, including shorebirds, Anatidae (ducks, geese and swans), cranes, and seabirds (divers, cormorants, gulls, shearwaters, and auks). It encompasses 22 countries, stretching from the Russian Far East and Alaska, then southwards through East Asia and Southeast Asia, to Australia and New Zealand.

With a vision to conserve the migratory birds and their habitats along the EAAF, the East Asian–Australasian Flyway Partnership (EAAFP) was established in 2006. The EAAFP provides a flyway-wide framework to promote dialogue, cooperation, and collaboration among a range of stakeholders to conserve migratory waterbirds, their habitats, and the livelihoods of people dependent upon them. The Partnership is supported by all levels of governments, site managers, multilateral environment agreements, technical institutions, UN agencies, development agencies, industrial and private sector, academe, non-government organisations, community groups, and indigenous peoples and local communities.
