

EAAFP MOP12 Reporting Template for Working Groups, Task Forces, and the Technical Sub-committee

Dear Partners,

To report on the progress of the implementation of the [EAAFP Strategic Plan 2019-2028](#), a Reporting Template was developed at the 10th Meeting of Partners (MOP10) in Hainan, China which was subsequently used to gather progress from Partners for MOP11 held in Brisbane, Queensland, Australia.

The EAAFP Secretariat has amended the reporting template to account for the feedback gathered at MOP11 as well as the MOP11 decisions specifically Key Results Areas 1.2 and 1.6. To streamline the process and reduce the length of the reporting document, three separate templates have been created: for (1) Government Partners, (2) Non-Government Partners, and (3) Working Groups, Task Forces, and the Technical Sub-committee.

The “Reporting Questions” are linked to Key Result Areas to enable an assessment of progress with the implementation of each element of the Strategic Plan. Indicators have been provided to facilitate reporting and assess our achievements.

As this Reporting Template was developed in alignment with the Strategic Plan, some questions may appear to overlap. However, completing them all will provide comparability with the previous [Partner Reports](#) submitted for MOP11.

While the total number of questions for Working Groups, Task Forces, and the Technical Sub-committee is 27, the number of questions for each Partner Group, and each mechanism of the Partnership, is shown below:

Government	50 Questions
Non-Government	43 Questions
Working Groups, Task Forces & Technical Sub-committee	27 Questions

This Reporting Template has been sent to the Focal Point of each Partner, the Chair and Vice-Chair of each Working Group and Task Force, and the Chair of the Technical Sub-committee.

Thank you,

Jennifer George

Chief Executive, EAAFP Secretariat

The EAAFP Reporting Questions

General Information

Reporting Group	<input checked="" type="checkbox"/> Working Group <input type="checkbox"/> Task Force <input type="checkbox"/> Technical Sub-committee <input type="checkbox"/> Other (please specify:)
Name of Working Group or Task Force	Avian Disease Working Group
Designated Chair	Name : Simba Chan Position : Associated Researcher Organisation : Wild Bird Society of Japan Street Address/ P.O. Box : Maruwa Bldg.,3-9-23 Nishi-gotanda, Shinagawa-ku Postal Code/City : Tokyo 1410031 Country : Japan E-mail address : simba2018reborn@gmail.com Phone Number : 81354362633 Website : http://www.wbsj.org

Reporting on the implementation of the EAAFP Strategic Plan

Reporting Period: 2023 – 2025

Note: Questions specifically targeting Working Groups and Task Forces are highlighted. Questions without specifically mentioning Working Groups and Task Forces shall be answered by all Reporting Group members (WG/TF/TSc).

OBJECTIVE 1 Develop the Flyway Network of sites of international importance for the conservation of migratory waterbirds, building on the achievements of the Asia-Pacific Migratory Waterbird Conservation Strategy, with the ultimate goal of establishing a sufficient and efficient network of sites with sustainable management. (FSN page: <https://www.eaaflyway.net/the-flyway/flyway-site-network/>)

- Supplementary information: [EAA Flyway Network Sites Overview Report 2013](#), [EAAFP Strategic Plan 2019-2028](#)

KRA 1.1 A comprehensive and coherent Flyway Network of Sites is developed for migratory waterbirds, including sites that are not currently Protected Areas.

KRA 1.2 National and Site Partnerships have been developed to coordinate the implementation of the EAAFP at national and local levels.

KRA 1.3 Flyway Network Sites are valued by the community and sustainably managed.

KRA 1.4 Where appropriate, Flyway Network Sites are being sustainably used to support subsistence livelihoods of the local community.

KRA 1.5 Partners and local stakeholders are engaged in responding to activities which may threaten Flyway Network Sites.

KRA 1.6 The EAAFP Sister Site Programme has expanded.

OBJECTIVE 2 Enhance communication, education, participation and public awareness (CEPA) of the values of migratory waterbirds and their habitats.

KRA 2.1 The achievement of the elements in the EAAFP CEPA Strategy and Action Plan (2023-2028)

Indicator 2.1.1 The CEPA Action Plan has been monitored, reviewed and updated as necessary to inform the EAAFP.

1.

Is your **Working Group** or **Task Force** aware of the [EAAFP CEPA Action Plan 2023-2028](#)?

☐ Yes

☒ No

Additional information:

It is hard to say. I believe most of the Working Group members are aware of the EAAFP CEPA WG but not its action plan.

2.

Has your **Working Group** or **Task Force** incorporated elements of the CEPA Action Plan in your work plan? (e.g. encourage academic institutions to conduct monitoring activities at Flyway Network Sites, and identify and encourage experts to share their expertise in migratory waterbird conservation)

☒ Yes
☐ No

Additional information (examples of how the Action Plan was reflected, e.g. in Flyway Network Sites, targeting the public, etc.):

We have been keeping a close contact with the CEPA WG, since CEPA activities for Avian Diseases is a key element in preventing and preparing for disease outbreaks.

3.

What kind of support would you like to receive from the CEPA Working Group to effectively implement the Action Plan successfully in your **Working Group** or **Task Force** work plan and associated activities?

Additional information:

So far the ADWG does not have a work plan as the WG is re-established after MOP11. But we believe we will need good promotion of communication, education and awareness of many avian disease issues (at this stage avian influenza) and we expect to work with CEPA WG closely.

OBJECTIVE 3 Enhance flyway research and monitoring activities, build knowledge and promote exchange of information on waterbirds and their habitats.

KRA 3.1 National monitoring systems to assess the status of migratory waterbirds and their habitats are established, maintained and further enhanced.

KRA 3.2 Conservation status reviews for waterbird populations are produced and updated to set and adapt priorities for action.

Indicator 3.2.1 Data describing waterbird population estimates, trends and distributions are available to the Partnership.

4.

Please report briefly on data management of your **Working Group** or **Task Force** in relation to migratory waterbird population estimates, trends and distributions.

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Probably not relevant to this working group.

Indicator 3.2.2 Two updates of waterbird population estimates have been produced and published.

5.

Please report on your planned contribution to the migratory waterbird Conservation Status Review II. Please see the [CSR I Report](#) for further reference.

Your Response:

Probably none at this stage.

KRA 3.3 Updated list of sites of international importance for migratory waterbirds for conservation management and prioritisation.

KRA 3.4 A stronger understanding is developed on the anticipated impacts of climate change on waterbirds and their habitats and this is informing planning and site management.

Indicator 3.4.1 Improved knowledge about threats, including climate change impacts, on waterbirds and their habitats is shared and appropriate action taken where possible.

6.

Please provide details on key research on climate change impacts on migratory waterbirds and wetlands in the EAAF relevant to your work in TSc, Working Group, or Task Force, published since MOP11 (March 2023).

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Probably not relevant to this working group.

KRA 3.5 Collaborative research programmes are established to provide effective support for conservation and sustainable management efforts, particularly the sustainable use of resources for local livelihoods benefits.

Indicator 3.5.1 Research programmes on improving conservation and sustainable management outcomes have increased.

7.

Please provide brief information on areas of collaborative research programmes TSc or your Working Group or your Task Force has been involved in since MOP11 (March 2023) about the improvement of conservation and sustainable management outcomes at internationally important sites for migratory waterbirds. Please also share any recent similar research programmes, both regionally and globally, that you are aware of.

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Although little has been done formally at this stage, collaborative research on avian disease epidemiology, vulnerability of sites and species and related issues will need cross-sectoral collaboration and communication. ADWG is trying to identify and bring together information from research through communication of research results from both the scientific literature and the considerable expertise of ADWG members.

Indicator 3.5.2 Knowledge generated is being applied in at least 50% of internationally important sites for migratory waterbirds.

8.

Please give examples of how knowledge generated through research programmes on the improvement of conservation and sustainable management outcomes is being applied at internationally important sites for migratory waterbirds.

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Research and monitoring of avian diseases and impacts on waterbirds is quite extensive (especially HPAI), but knowledge generated is only spottily applied, and better coordination among wildlife, veterinary and public health officials is needed. This is something we are interested in and hope to promote.

KRA 3.6 Best practice guidelines for waterbird and habitat conservation programmes, including the incorporation of traditional knowledge, are developed and made available.

Indicator 3.6.1 Best practice guidelines are available on the EAAFP website.

9.

Please provide brief details on the development and application of national-level best practice guidelines for waterbird and habitat conservation, including the application of traditional knowledge, published/made available since MOP11 (March 2023).

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Something we really want to do, since it is very important (not so much traditional knowledge per se), but bringing together experts and practitioners from different sector related to avian disease control and prevention. We would like to work more to get this information in one place, e.g. on EAAFP website (dedicated AD page?)

10.

In what ways have you considered, or already included traditional knowledge, Indigenous Peoples and Local Communities (IPLCs), or citizen science in your work?

Additional information:

Citizen science may contribute to surveillance of wildlife disease but guidelines must be given.

OBJECTIVE 4 Build the habitat and waterbird management capacity of natural resource managers, decision makers and local stakeholders.

KRA 4.1 EAAFP promotes the use of the range of available training tools and provides assistance to address challenges at Flyway Network Sites.

Indicator 4.1.1 All Partners and Secretariat have mechanisms for capacity building in place to facilitate the sharing of knowledge, tools and experience.

11.

Have you been involved in identifying/developing capacity building activities and materials about migratory waterbird and habitat management?

If yes, please provide some details.

- ☐ Yes
☐ No
☒ Planned

Additional information:

training of site managers and workers on wildlife disease surveillance is very important, as is fostering communication and cooperation among sectors. Targeted capacity building efforts are much needed.

12.

Have you implemented capacity building activities and materials for migratory waterbirds and the management of their habitats?

If yes, please provide feedback on their values.

- ☐ Yes
☐ No
☒ Planned

Additional information:

good management of flyway sites is important in maintaining healthy environment at the sites. We have not managed to implement capacity-building yet, beyond sharing information, but hope to do this, should resources allow.

Indicator 4.1.2 Partners and the Secretariat include capacity building assessment in project proposals.

<p>13.</p> <p>Have you included a training needs assessment or survey in projects you have developed, funded, and/or implemented since MOP11 (March 2023)?</p> <p>If yes, please provide some additional information.</p> <p>Additional information:</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable <input type="checkbox"/> Planned
---	---

Indicator 4.1.3 The EAAFP online technical training manual for Flyway Site management is supported and used by at least 50% of Flyway Site Managers.

<p>14.</p> <p>Have you used the EAAFP online technical training materials for Flyway Site management? Please provide some additional information on the usefulness of materials.</p> <p>Additional information:</p>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Planned
--	--

KRA 4.2 Capacity of Partner Focal Points and site managers to pursue the EAAFP objectives has increased.

Indicator 4.2.2 At least one meeting of Partner Focal Points, including site managers, is held per annum.

<p>15.</p> <p>Have you been able to participate in any meetings of EAAFP Partner Focal Points? (e.g. Science Symposium, ASEAN Flyway Network workshops, CMS COP, etc.)</p> <p>If yes, have any new collaborations with other EAAFP Partners been developed from the meeting/s? Please provide details.</p> <p>Additional information:</p> <p>The WG has strong membership and participation from many EAAFP Partner organizations and joint presentations have been held at several forums, including those mentioned above.</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Planned
---	--

KRA 4.3 Corporates with operations impacting on migratory waterbirds are engaged in delivering better outcomes for the conservation of waterbirds and their habitats.

Indicator 4.3.1 An increased number of internationally important sites and programmes, in which Corporates are contributing to positive outcomes for migratory waterbirds and their habitats.

<p>16.</p> <p>Please provide details you, as Working Group or Task Force, have on corporate engagement at internationally important sites and in programmes to develop positive outcomes for migratory waterbirds and their habitats.</p> <p>*Please provide weblinks if available online or references for relevant publications.</p> <p>Your Response:</p> <p>Not really applicable to ADWG</p>
--

OBJECTIVE 5 Develop, especially for priority species and habitats, flyway wide approaches to enhance the conservation status of migratory waterbirds.

KRA 5.1 Partners are actively collaborating to develop approaches to conserve migratory waterbirds and their habitats in the EAAF across national boundaries.

Indicator 5.1.1 At least 50% of Partners are collaborating across national boundaries initiatives for the conservation of migratory waterbirds, particularly for threatened migratory waterbirds.

17.

Please provide brief details the transboundary involvement of your **Working Group** or **Task Force** in international collaborative initiatives for threatened migratory waterbirds (e.g. North-East Asian Subregional Programme for Environmental Cooperation, ASEAN Flyway Network, Arctic Migratory Birds Initiative, bilateral agreements, Sister Sites etc.).

*Please provide weblinks if available online or references for relevant publications.

Your Response:

This working group is established for a good transboundary cooperation, since this is vital in limiting the spread and impacts of avian disease. We have developing a concept note to promote this (includes FSN, CEPA and cross-sectoral capacity building).

18.

What does your **Working Group** or **Task Force** consider to be the key innovative and/or improved approaches to the conservation of migratory waterbirds and their habitats since MOP11 (March 2023)?

*Please provide weblinks if available online or references for relevant publications.

Your Response:

We are building up an international network on avian influenza of wild birds.

KRA 5.2 Threatened migratory waterbirds are protected from threats and populations are stable or increasing.

Indicator 5.2.1 The Partnership, with leadership from IUCN, BirdLife International & Wetlands International, is updating and maintaining a list of threatened migratory waterbird populations and encouraging Government Partners to protect these threatened populations under national legislation.

19.

Please provide information on the development of a list of threatened migratory waterbird populations in the EAAF in which your **Working Group** or **Task Force** has been involved in.

*Please provide weblinks if available online or references for relevant publications.

Your Response:

This WG has not been involved in the development of a list of threatened waterbird population in the EAAF, but there is suggestions of evaluating the vulnerability of species and sites to avian influenza.

20.

Has your **Working Group** or **Task Force** been involved in taking actions to reduce threats to migratory waterbirds?

If yes, please provide some examples of measures taken (e.g. addressing negative impacts of renewable energy, habitat restoration, etc.)

☒ Yes

☐ No

☐ Planned

Additional information:

Providing information to stakeholders on the threats of the HPAI, developing a concept note for potential project. Will do more.

Indicator 5.2.2 Single Species Action Plans are developed and implemented for threatened migratory waterbird species in the EAAF.

21.

Please outline the contribution your **Working Group** or **Task Force** has made to the development and implementation of Threatened Species Action Plans since MOP11 (March 2023) (e.g. Far Eastern Curlew, Masked Finfoot, Black-faced Spoonbill, Spoon-billed Sandpiper).

*Please provide weblinks if available online or references for relevant publications.

Your Response:

We will highlight the threat of HPAI to the Black-faced Spoonbill in the new edition of the International Action Plan.

Indicator 5.2.3 Populations of threatened migratory waterbirds are either stable or increasing.

22.

Has your **Working Group** or **Task Force** been involved in any programme(s) to assess changes in the status of populations of threatened waterbirds?

If yes, please provide details.

☐ Yes

☒ No

☐ Planned

Additional information:

KRA 5.3 Regional Action Plans are developed and implemented for priority geographic regions of the EAAF.

Indicator 5.3.1 Development and implementation of Regional Action Plans for geographical regions with common critical threats in the EAAF.

23.

What has been your **Working Group's** or **Task Force's** involvement in the development and implementation of Regional Action Plans (e.g. ASEAN Flyway Network, Indo-Burma Ramsar Regional Initiative, Arctic Migratory Birds Initiative, Secretariat of the Pacific Regional Environment Programme)?

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Not yet involved at this stage but will do when we have more resources.

KRA 5.4 Measures to reduce and, as far as possible eliminate, illegal hunting, take and trade of migratory waterbirds are developed and implemented.

Indicator 5.4.1 All Government Partners have mechanisms in place to reduce and, as far as possible, eliminate, illegal hunting, take and trade of migratory waterbirds.

24.

What work has your **Working Group** or **Task Force** done to reduce and, as far as possible, eliminate illegal hunting, taking and trade of migratory waterbirds?

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Not relevant to this working group.

KRA 5.5 The conservation of migratory waterbirds and their habitats is mainstreamed into national legislation and/or policy instruments including adaptation to the impacts of climate changes.

KRA 5.6 The conservation of migratory waterbirds and their habitats is integrated into relevant multilateral and bilateral agreements and other regional mechanisms.

Indicator 5.6.1 Relevant environmental agreements recognise the EAAFP as an effective regional framework to conserve migratory waterbirds and their habitats.

25.

Please provide any suggestions your **Working Group** or **Task Force** has on strengthening existing multilateral regional and bilateral agreements, and other regional mechanisms to deliver better outcomes for migratory waterbirds and their habitats.

*Please provide weblinks if available online or references for relevant publications.

Your Response:

Only just starting but certainly we can contribute to many multilateral and bilateral agreements, including those related to HPAI, specifically the role and impact on wild birds, e.g., integrating wild birds into One Health programs (e.g., FAO, UNEP, WOA, WHO, etc)

Others

26.

Please provide any feedback you have on this Partner Reporting Template.

Your Response:

too many questions. Have to consider some questions are not relevant to some WG/TF. Maybe have a short section which provides an overview of activities and achievements (and challenges) since the last MOP (maybe this is already being done through another channel?)

27.

Please add any additional information you would like to share with us.

Your Response:

Not at this stage but there will be more at MOP 12.
